INJUN SUMMER

(Copyright: 1912; By John T, McCutch eon. Reprinted here by reneral request.)

Tep, sonny, this is sure enough Injun summer. Don't know what that is, I reckon, do you? Well, that's when all the homesick Injuns come back to play. You know, a long time ago, long afore yer granddaddy was born even, there used to be heaps of Injuns around here—thousands—millions, I reckon, far as that's concerned. Reg'lar sure 'nough Injuns—none o' yer cigar store Injuns, not much. They wuz all around here—right here where you're standin'. Don't be skeered—hain't none around here now, leastways no live ones. They been gone this many a year. They all went away and died, so they ain't no more left.

But every year, 'long about now, they all come back, leastways, their sperrits do. They're here now. You, can see 'em off across the fields. Look real hard. See that kind o' hazy, misty look out yonder? Well, them's Injuns—Injun sperrits marchin' along an' dancin' in the sunlight. That's what makes that kind o' haze that's everywhere—it's jest the sperrits of the Injuns all come back. They're all around us now. See off yonder, see them tepees? They kind o' look like corn shocks from here, but them's Injun tents, sure as you're a foot high. See 'em now? Sure, I knowed you could. Smell that smoky sort o' smell in the air? That's the camp-

You jest come out here tonight when the moon is hangin' over the hill off yonder an' the harvest fields is all swimmin' in th' moonlight, an' you can see the Injuns and the tepees jest as plain as kin be. You can, eh? I knowed you would after a little while.

Jever notice how the leaves turn red 'bout this time o' year? That's jest another sign o' redskins. That's when an old Injun sperrit gits thed daneld' an' goes up an' squats on a leaf t' rest. Why, I kin hear 'em rustlin' an' whisperin' an' creepin' round among the leaves all the time; an' ever once 'n a while a leaf gives way under some fat old Injun ghost and comes floatin' down to the ground. See—here's one now. See how red it is? That's the war paint rubbed off'n an Injun ghost, sure's you're born.

Purty soon all the Injuns'll go marchin' away agin, back to the happy huntin' ground, but next year you'll see 'em troopin' back-th' sky jest hazy with 'em and their campfires smolderin' away jest like they are now.

Conditions in the coal fields of t Virginia are bad," said Dr. Fred-A. Besley of Chicago and Wauke-in the course of discussions on betty wales

A Shock to Civilization

In some parts of the Oklahoma of "In some parts of the Oklahoma oil fields," Dr. Besley continued, "conditions are so bad that the public would hardly believe they could exist in a civilized country. This is due not to much to wanton indifference on the part of employers as first, to isolation; second, to the cheapness of labor and the consequent lack of economic vision, and third, to inadequate compensation laws.

The American College of Surgeons's made and is continuing to make earches on the care of the industry injured and we find that the dical schols are not giving as much the and thought to this subject of umatic injuries as they should.

"But in this industrial age traumatic surgery has become one of the most urgent problems of the time. In the American industries in 1922,000 workers were killed and over a million were injured. And despite this cruel record, traumatic surgery has not been placed on a basis sufficiently comprehensive to enable it to meet the demands of a great humanitarian and economic problem. BY GEORGE SMITH.

[Chiesre Tribune Press Service.]
TORONTO, Ont., Oct. 16.—Ramsay
MacDonald, Great Britain's Labor
prime minister, came into Canada on
a trolley car over the Niagara Falls

evening he was ensounced in government house, Toronto, as guest of Lieut. Gov. W. D. Ross, the king's official representative in Optavio.

The friendly nod of the grey hatched head and the winning Machonald smile were extended to thousands of Canadians who lined the station platforms at St. Catharines. CALL STRIKE OF STEAMFITTERS ON CITY PROJECT

Jurisdictional differences between the Chicago steamfitters and plumbers yesterday led to the calling of a strike of steamfitters employed on the city's incinerator on Goose island. Approximately sixty steamfitters are involved in the walkout.

pute between the steamfitters and plumbers was adjusted by the international union, to which both loca trades belong. Since the signing of the so-called peace treaty the plumbers, it is said, have refused to abide by its terms and have caused a number of building projects to be halted.

Arrangement was made yesterday for Commissioner of Public Works Wolfe to call a conference of both factions today for the purpose of adjusting the latest outbreak. Charles Mulcahy is business agent of the plumbers union and he announced he will at tend the conference.

are made of heroic material!

Let's face the facts—the seat of your trousers usually wears thin first. And (need we mention it), it has also been known to get shiny.

The materials in the "Madison" are selected with just this fact in mind-they will wear and wear. And, too, the fabrics are so woven that your trousers will keep their correct lines in spite of hard wear.

The "Madison" is known for its sturdiness-but it is also famous for its remarkably low price-making it doubly interesting. Try on the new fall and winter styles.

Prepossessing proposition

Refreshing in its unaffected simplicity is this exclusive new Peck & Peck material-a two-piece dress in check plaid covert. Box tucking on the trim buttoned jacket is repeated to form pyramided pleating on the skirt, combining the virtues of a youthful silhouette with easy, unhampered movement. The vestee snaps very practically to the bodice. In purple, red, copper, blue, black, brown or green. \$50. The hat of imported Feutre glace favors a softly turned brim and gay feather quill, \$15.

Without that proof we should be un-willing to believe Mr. Wales would ascribe to Lord Bridgeman such an indiscretion. It is doubtless an error of memory, but what is of interest and importance to the American public is not only that the representative of a great news-paper was not deceiving its readers but that as a matter of fact it was giving the essential news opportunely, as it has since officially transpired. Mr. Coolidge and Mr. Kellogg knew what was sought on both sides and have since made public comment upon it. The Geneva conference failed, not, as it has been alleged in Great Britain, because a dastardly American press conspired to misrepresent the British demands, but because those demands were unacceptable to the American government, as they certainly are to the American people. They were incompatible with the principle of parity, whatever Lord Bridgeman said or did not say. These accusations of misstatement, we suggest,

are not unworthy of consideration at this time when the American people are waiting to hear what fruits of agreement have been borne by the recent conference between Mr. Hoover and Mr. MacDonald. The matter which is of vital importance is whether the American public is beportance is whether the American public is being betrayed by the American press through the publication of falsehoods. We have recently had publication of falsehoods. We have recently had a sensational official inquest into the activities of a Mr. Shearer. It has not yet been disclosed that Mr. Shearer distributed anything but facts to which the American public is entitled and should have had directly from the official sources maintained by the taxpayers. We have now a high ex-official in England charging misstatement and sinister mischief by American newspaper correspondents, when, as a matter of fact, the story told by these men contemporaneously with the event has been fully verified. What we should surder was found guilty by a jury in the like to know is whether there is a drive on to tes District court in Alabama. THE WAKE-LINE mail is deluged, of course with comments on the recent world series. Many of them are humorous, for even in our misfortune there were incidents in that series which offer material for quips and laughs. A surprising part of this mail, however, is devoted to razzing and fault finding, justifying the classic, attributed, we believe, to Babe Ruth, of "One day you're a hero and the next day you're a burn."

Indeed, we all are disappointed by the result The Cubs have more reason to be disappointed than any of the rest of us, both because of loss of prestige and loss of \$2,000 per player, the difference between the winners' and losers' end of the players' pool. Therefore it will not be the policy of this column to "rub it in." Would that be good

WHEN IOWA defeated Minnesots in football last fall, 7 to 6, the then Wake published comment deploring that games between elevens otherwise equally matched should be decided by the point after touchdown. Immediately we were bombarded with indignant Hawkeye protests accusing us of everything from belittling Iowa's victory to robbing the church poor box. The more venomous came from undergraduates, but undergraduates get that way, and we rather enjoy their partisanship. Of course, we intended nothing of the kind. We simply were trying to score for our opinion-past,

make a point after touchdown should not determine the issue between two equally matched elevens. We never have registered with the rule makers and probably never will, but we can't help wondering if those same Iowa letter writers of a year ago now are willing to concede that the Buckeyes, who counted on a blocked punt and kicked goal, are better than the Hawkeyes, who scored one touchdown and failed to kick goal, then crossed the Buckeye goal line again on a play called back for offside. If so, they disagree with critics who viewed the fray.

OYSTER COCKTAIL

More in surrow than in anger, the five sitting judges of the Superior court who were criticized in the report of the Chicago Bar association on the candidates for the judicial election Nov. 5, yesterday expressed resentment at the association's reflections on their efficiency. Each of the judges declared that he had no anger toward the body, but felt that its comment was unfair.

"I have no quarrel with the Bar association," said Judge Gemmill in voicing the general feeling. "An impartial investigation of the Superior court decisions reviewed by the Supreme court in the last six years shows that I have the highest percentage on affirmed to Judge Pam declared that his interest in philanthropic and charitable

America's Great Music House

Listen to sunshine thru DUO-ART music

Y/HEN the gray of autumn hangs in the road and leaves go scurrying at hide-and-seek outside the door, Duo-Art brings sunshine in a silver shower that might have followed soft spring rain. For every mood it has an answer. At a touch of the hand its music interprets the world about us, some fragment of the past or the musical masterpieces which are timeless. No wealth can be truly rich, no home completely satisfying without its quiet and ennobling influence.

The greatest of the world's great planists are Duo-Art recording artists . . . Paderewski, Hofmann, Horowitz, Bauer, Elly Ney. You hear the color emphasis of every note their own hands strike, exactly as they play it. The atmosphere their genius creates will be a cultural Inspiration in the home you live in, to the children you love. Duo-Art Music comes in combination with such names as Steinway, Weber, Steck and Stroud from \$1295. Listen to sunshine thru Duo-Art music today.

SAN ANTONIO --old in years--young in spirit!

winter, south to sunny San Antonio
... where the Alamo drowses on a
palm shaded plaza, brooding over the memory of its valiant defenders... while
nearby, steam shovels chew out foundations
for new skyscrapers, schools and factories
to keep pace with the city's lusty growth.

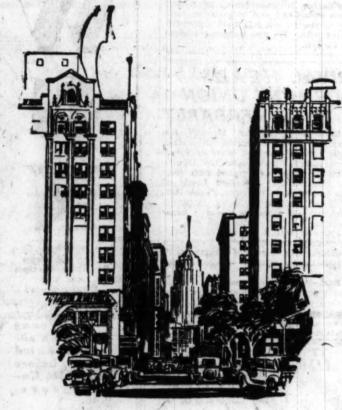

You will find a city old in years and young in spirit! Once the capital of a Spanish province, it is now the metropolis of a vast empire, rich in every form of opportunity.

Step into the cloistered dimness of Spanish missions—old when Washington crossed the Delaware—and yield to the spell of those intrepid pioneers who wrested this land from the wilderness... then out into the sunlight and motor through picturesque villages or fly to the coast for duck hunting!

Here is a glamorous blending of the old and the new in a hospitable city blessed with golden, health-giving sunshine and dry. invigorating air, where, for 44 years, the October temperature has averaged 70.5 degrees: November, 60.3; December, 53.7; January, 52.3; February, 55.4; March, 62.8 a winter average of better than 59 degrees!

Plan NOW to come in time for the autumn horse show and races, witness the famous Texas Open golf tournament and stay for the army-civilian polo matches. Run the gamut of sports and recreation offered in this happy clime, where folks take time to really live!

Play tennis on municipal courts beside the winding river or the bubbling springs of San Pedro or on the terraced courts of country clubs. Golf over velvety greens on superb city-owned or club courses. Canter along leafy bridle paths in the crisp morning air and end with breakfast over an open fire in a beautiful park.

Paved highways leading north to the nearby hills or south to the sea are passports to the sportsman's winter paradise. Deer, turkey, quail and other game, in season, flourish on broad preserves. Only a few hours away by motor is the best duck shooting in the world on the gulf coast. Here, too, you can pit your skill and strength

against the fighting tarpon and many other game salt-water fish. In the clear waters of lake and stream black bass await your cast.

San Antonio was an outpost of the king of Spain, in 1718. The stirring defense of the Alamo was a glorious epoch of the Republic of Texas. Long before the Civil war the United States government had established an important military post here. And today it is the Nation's greatest army and flying center. Right now millions are being spent to make Randolph Field the "West Point of the Air."

With four army aviation fields already in use and the fifth in the making, an excellent municipal airport and several private fields, San Antonio is the southern capital for the air-minded!

The great natural resources of South and West Texas—coveted two centuries ago by France and Spain—have barely been scratched, so rich is this vast section. But winter truck farms, dairy herds and citrus groves are now crowding back the ranches, where millions of cattle once roamed. Numerous oil fields are pouring their steady stream of wealth into San Antonio. Raw materials are at hand. Labor is plentiful. Electric power and natural gas are turning machinery. Transportation facilities include the deep-water port at Corpus Christi.

Is it any wonder that San Antonio's population trebled from 1900 to 1920 and has almost doubled in the decade since... that manufacturing plants increased from 277 in 1919 to 1175 in 1929?

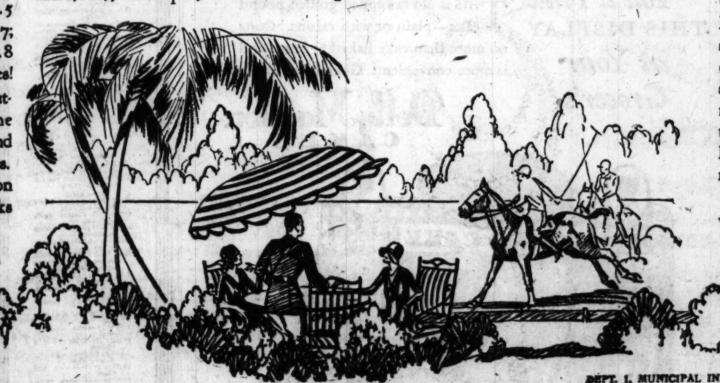

Yet this is only the beginning! San Antonio is the mother city of a huge area

that offers an almost unlimited field for development of every description. Opportunities are legion. Millions of fertile acres still await the plow... here is a growing market of which San Antonio is the natural trade center; an immediate market that embraces 132,000 square miles in Texas and reaches far into Mexico; a market that grows richer month by month as more men and more money speed the development of this last and greatest of America's frontiers!

Come see for yourself the dividends of health, happiness and mounting profits this section is paying... and play outdoors under a smiling, sapphire sky, for it is Indian summer all winter in San Antonio. In this metropolitan city of 300,000, a cosmopolitan society—robust as the New West, hospitable as the Old South and smart as its military trappings—takes time to really live!

Travel the Road to Romance, this winter, south to sunny San Antonio!

IRISH PROTEST RELIGIOUS VOW OF BRITISH KING

Want Him to Drop Pledge to Protestantism.

BY DAVID DARRAH.

LONDON, Oct. 15 .- Under the new atus given King George three years thes him monarch of the seven untries of the commonwealth, all an equal basis, the question of the king's religion has arisen.

May Come Before Conference. It will not likely be brought up at the present special imperial confer-ence now meeting in London, but it is to be broached at the full imperial

onference next year. The Irish, who wish to have the rious declaration removed from coronation declaration, point out that the position of the king of Eng-land in relation to the commonwealth has been completely altered in the last three years and that King George is the link between Great Britain and in fact, the king of each country.

The question is also being discussed in England, and high constitutional authorities believe that if any commonwealth demanded that this decbe not made, an awkward could be created.

THORNE PLEADS INABILITY TO PAY

Hoover to Dedicate Shaft at Cincinnati Oct. 24.

Cincinnati, O., Oct. 15.—[U. P.]—
Puming and blowing, the Ohio river steamer Cincinnati pulled away from here today on an epochal journey—
a trip that marked completion of a 160 million dollar navigation project and fruition of a century old dream.
For the first time since the white man first saw the beautiful Ohio, the river was navigable, fair weather or foul, from Pittsburgh to her mouth near Cairo, Ill. This was made possible by the completion of a chain of 50 government dams and locks—a chain unrivaled in the world of intend navigation.

D ROWN—one of the mode's favored children this season—becomes the acme of smartness when it is used for the matching ensemble-coat, frock, hat, and accessories, all in perfect accord as to shade and quality of tone. Foreseeing its great importance, we planned accordingly for the brown ensemble in assembling our comprehensive stocks.

CO THAT here you find this color—which you are favoring so highly—in frocks, coats and hats, shoes and bags, and blending tones in gloves, hosiery and jewelry—and here you may purchase a complete costume as economically or as lavishly as you choose. The pictured costume tells well the success you may anticipate in making your selection here.

(a) Fox luxuriously lends its glowing depth of color to the Cressella cloth of this coat, which is representative of those smart cloth coats which the chic woman is favoring for dress wear. Women's coats, \$245. Other brown coats in this section range in price from \$95 to \$450.

Fourth Floor, North, State.

(b) Fishnet, fashion's newest whim, bids fair to become one of those dress modes which lose nothing of their chic in popularity. Shirred to a close fitted hipline, this brown frock has gracious low-placed fullness. Also green and black. \$85. Women's sizes. Other brown dresses in this section range in price from \$50 to \$125.

Fourth Floor, North, State.

(c) Felt, closely moulded in intricate lines and clever seamings, has been used to make this hat of dark brown, which is a Patou reproduction. To be had in the French Room, \$25.

Fifth Floor, North, State.

(d) Suede, in dark brown to match the coat, has been enhanced by a frame and clasp of marcasite in an effective handbag for afternoon. \$85. Other brown suede bags, \$7.50 to \$65.

First Floor, South, State.

(e) Suede has likewise been chosen for the one-strap slippers - again in dark brown (may also be had in black) -with lizard and kid. \$15. Other brown suede slippers, \$10.75 to \$20.

Third Floor, South, State.

(f) Glace kidskin is of the finest, lightest weight in eight-button mousquetaire gloves for smartest afternoon costumes, in shades that blend with the frock. \$5.75. Other brown kid gloves, \$2.50 to \$10.

Madison, Wis., Oct. 15 .- [Special.]-Faced by the need for more punch in Badger backfield for the battle with Notre Dame Saturday, Coach Thistlethwaite tonight used Milo Lu-bratovich, giant 225 pound tackle at full back. Lubratovich, a native of Duluth, Minn., who won his letter in the line last year, showed plenty of power, but was a trifle slow afoot. Saturday Games to Offer Study in Football Styles of George Earnshaw.

BY WALTER ECKERSALL.

With an imposing array of football the defense. On first and second truggles scheduled in various parts of the country Saturday, it will be interesting to contrast the styles of of fense and defense employed.

As far as the offense in concerned the basic principles of attack have been mastered. The straight plunges drives off tackles and end runs were learned earlier in the season, as were the simple forward passes. Since then the formations have become more complicated, and as a result intricate at acks come into usage.

When Minnesota and Northwestern elevens, meet at Evanston Saturday fans will get an opportunity to see single, double and triple reverse for-mations used extensively. These are among the strongest plays in football if properly executed. Coach Dick Hanley of Northwestern and Dr. C. W Spears of Minnesota have used these combinations continually since they

Badgers Employ Passes

Notre Dame, opponent of Wisconsin at Soldiers' field, also will employ nese plays, although Coach Rockno indoubtedly will rely chiefly upon his pinners with the fullback carrying he ball through the line. Wisco probably will use the straight and open attack. Against Northwesterr the Badgers successfully executed for-ward passes. At other times their straight attack between the tackles netted gains.
Illinois, which will play its first con-

By now players should have learned adjust themselves while playing on downs, the secondary defense should not play too far back. If big yardage is needed on the third down, the sec dary should move back as a forward pass or kick should be the next play. The same holds for the fourth down. If the offensive eleven is making ground through the line, the defensive forward wall should tighten up by playing closer together.

Some coaches entertain different ideas regarding a forward pass defense. Some employ the zone defense former style, a defensive back must This is true of each of the four defense method, each defensive back player and follow him wherever he goes. On all forward pass plays, the tackles generally are assigned the task of hurrying the passer.

Passer Can Not Be Held.

In this connection however, it is necessary to state that the tackles cannot tackle and hold the passer after he has thrown the ball. passer virtually is the only safety man in case the pass is intercepted by the defense. If the forward pass-r is tackled and held, it is to be interpreted as defensive holding calling for five yard penalty from the spot of the foul and the ensuing down to be first down with ten yards to gain. The regaining of first down as the distance penalty of five yards would hardly bring the ball to the spot where it was previously put in play.

That's the way Manager McCarthy talked when he brought his Cubs back to Chicago yesterday. That's the way he talked to the different men during the long ride back from Philadelphia where the day previous the Athletica had vanquished them in the struggle for the world title.

Despite McCarthy's encouraging words, however, there were some lowered heads as the disappointed athletes stepped off their special train at the Union depot. But it helped them a bit to hear the cheers of some 500 faithful, who crammed the train sheds so that they might prove that to them at least, win, lose, or draw, the Caba still are the Caba. who still are the Cubs.

Malone Has No Regrets. There were a lot of kind words for Hack Wilson as he waddled slowly through the depot reception line. No-body mentioned the loss of the fly balls that cost Saturday's game after the National leaguers had rolled up an 8 to 6 lead for Charley Root. "They give me hell with their ras-

PIERCE ARROWS

A Special Exhibit of Late Style Expressions in America's Finest Motor Car

ICHLY adorned/ with a new and extensive Autumn wardrobe, the new Straight Eight line by Pierce-Arrow opens the season with a special exhibit.

This showing embraces a new group of de Luxe models the very latest expression of Pierce-Arrow, and the utmost in artistry as applied to the finish and equipment of fine motor cars.

Pierce-Arrow puts emphasis on the fact that each model shown is of the new Straight Eight lineprecisely of the design that revolutionized the fashion in fine motor cars this year.

The colorings and the fabrics, the harmonizing of exteriors and interiors, are all crisply fresh creations of master decorators. The

appointments throughout are in the custom manner.

So far as mechanical features are concerned, it has always been maintained that in Pierce-Arrow is to be found every device of proved character known to the engineering of fine motor cars.

Such accepted improvements as non-shatterable glass, high-efficiency brakes, easy gear-shifts, and low center of gravity-in fact, whatever contributes to the safety

and comfort of motorists - 13 present in Pierce-Arrow automatically and as a matter of course.

Often other much-heralded devices are disregarded by Pierce-Arrow because of their inability to contribute to this car's smoothness and adaptability of power, its high degree of safety and comfort.

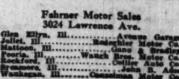

Pierce-Arrow has since the beginning enjoyed the distinction of being America's finest motor can The new Straight Eight this year has made it the most fashionable. And this season's colorings make it, beyond doubt, the most beautiful.

You are cordially invited to attend the Pierce-Arrow exhibit now being held. There has never been a more distinguished Pierce-Arrow

How often has the rattle of a carbon knock found you dropping back a little ... babying your car . . . slowing down on every hill?

And needlessly! For there is one oil -Shell Motor Oil - which stops carbon before it starts. Shell Motor Oil has an extremely low carbon content-far less than other fine oils, including many selling at a higher price.

And the small amount of carbon which forms in a Shell-lubricated engine is soft, fluffy and completely non-fouling . . . it actually blows away with the exhaust gases. It won't foul even a spark plug. It can't clog a high-compression engine.

Regular users of Shell Motor Oil report a marked saving in carbon

removal jobs. They enjoy freedom from power losses due to "frozen" piston rings and carbon-pitted valves. And they know the complete satisfaction which comes from driving a sweet-running automobile.

Shell Motor Oil is prepared only from Nature's richest lubricating crude by the new Shell low-temperature refining process. And before it reaches you, it is tested 259 times to certify that every quart possesses the four essentials of correct lubrication: Low Carbon Content, Non-Fouling Carbon, Ideal Body at All Operating Temperatures, and Low Pour Point.

GENERAL INFORMATION

IN recent years the American public has become increasingly well informed regarding investment matters, and investors today realize that a broad fundamental knowledge regarding economic and financial conditions is of great importance in successful investment.

Among the economic questions which are of real concern to investors are:-the economic status of foreign countries whose obligations are offered to American investors-which industries are upon the up-grade and which appear to be upon the down-grade-the efficiency of management in different corporations-the general trend of interest rates-and many other similar problems.

The Research Department of Lawrence Stern and Company maintains a well-equipped library of economic and financial information. In addition to the use of this data as a basis for recommendations to individual investors, this department is prepared at any time to compile special information regarding fundamental factors affecting investments for the clients of this house.

AMERICAN COMMONWEALTHS POWER CORPORATION

Consolidated earnings of American Commonwealths Power Corporation and its subsidiaries for the year ended August 31, 1929, irrespective of dates of acquisition.

GROWTH

Partly through acquisition of new properties and partly through increased sales of gas and electric service, the gross and net carnings of the Corporation increased as indicated by the following chart, based on the twelve months periods ending August 31st.

INCREASE OF 70% IN METERED CUSTOMERS

Since the incorporation of American Commonwealths Power Corporation, the number of metered customers has increased from 201,678 to approximately 350,000. The System now serves a population estimated at over 2,100,000 in 310 communities located in 22 States. This increase in customers is partly due to the strategic position of its well diversified properties and to the acquisition of important utility systems, one of the more recent acquisitions being the National Gas and Power Corporation properties.

CLASS A COMMON STOCK

EARNINGS PER SHARE: The earnings per share on the average number of Class A and Class B Common Stock outstanding during the twelve months ended August 31, 1929, before providing for depreciation, were equal to approximately \$2.50. This is predicated on the earnings reported but does not include earnings of approximately \$346,500 of recently acquired properties which, when added to reported earnings, increases the earnings available for both classes of Common Stock to approximately \$2.80 per share.

DIVIDEND POLICIES:

Directors of the Corporation have placed the Class A Common Stock on a dividend basis of 1/40th of a share mon Stock on a 10% stock dividend basis. Both classes of Common Stocks of the Corporation are traded in on the Chicago Stock Exchange and the New York Carb Exchange.

Railway Equipment Outlook.

Shares of the railway equipment manufacturers are being set forth as representing an industry which should give an exceptionally good account of itself over the balance of this year and through 1930. General expectation is that the leading companies will show results for the current half of this year to have been the best in quite a while. Unfilled orders on their books have been increasing substantially, as indicated by the placing of heavy orders for freight cars last week, and large inquiries for additional requirements are resulted for a first or figures. These companies are all showing good earnings.

City and County of Dallas Levee Improvement District

Serial 51/2% Bonds

Due Serially April 1, 1934 to 1958 inclusive Prices to Yield 5.75% for All Maturities

District: City and County of Dallas Levee Improvement District was organized for the purpose of co-operating with the City of Dallas and Dallas County in the development of the land lying in the Valley of the Trinity River. The District comprises approximately 9,150 acres, of which 7,217 will be made available for commercial, industrial and residential uses. This hand lies between the two developed sections of the City and many important properties, including the Union Station, serving all railroads entering Dallas, are located in the

Plan of Development: The plans that are now being executed provide not only the necessary works for flood protection, but also the street openings and extensions, underpasses, roads and bridges that will unite the two sections of the City of Dallas. The total cost of the project is approximately \$12,800,000 of which the District's portion is \$6,000,000, to be supplied in past from the

proceeds of the present issue. Actual work of construction began on July 24, 1928, and it is estimated that three years will be required for completion.

Security: These bonds are a part of a total issue of \$6,000,000 principal amount authorized at an election by the qualified tax paying voters. They are payable from unlimited taxes levied on all taxable property in the District in proportion to the assessed benefits. The official Board of Appraisement has certified to assessed benefits aggregating \$17,910,537.60, or approximately three times the amount of bonds authorized.

Furthermore, the actual land value behind the \$6,000,000 principal amount of bonds will be in excess of \$52,000,000, upon completion of the project, as appraised by the Appraisal Committee of the Dallas Real Estate Board. This valuation is equivalent to over \$8,500 for each \$1,000 principal amount of bonds

The Real Estate Security

on which he must perform all his productive work, and on and in which he lives his life, - are the primary elements on v values are built and, when correctly analyzed, make the most desirable security in the world for the support of an investment.

The first mortgage, or the first mortgage real estate bond, is an investment security that has an outstanding place in the investment portfolios of the insurance companies of this country and abroad, also in

higher yield securities that possibly may not possess the same degree of safety. Marketability is a secondary consideratio In our opinion there is, in a certain degree, confused and mistaken

thinking by the average investor in his consideration and selection of the real estate security. With the thought of clarifying the matter, and for the guidance of the investor in analyzing the real estate security, we suggest that he carefully examine it and determine, first, into which classification it falls.

The real estate security for practical investment purposes is classified

The real estate security that is related-1. To a single industrial use;

2. To a single quasi-industrial uses

3. To a single mercantile use; 4. To a diversity of industrial uses;

5. To a diversity of mercantile uses; 6. To office and related space;

7. To home occupancy in the aggregates 8. To home ownership;

In considering the real estate security falling in classes 1, 2 and 3, the rmity with principles heretofore noted by us in this series. In most ances the real estate security to the obligation of a manufacturin type of business activity that if there be a defect in the analysis of iness operation, the real estate security is more or less a security built on sand, unless the real estate has a reasonably quick market for sale or rent, with an equity, based on market rather than conventional appraisal values, sufficient to protect the security holder. Unless such real estate is so located and is of the type to have this marketability, the security is a dubious protection to the investor. Such location should usually be of a metropolitan character.

The real estate security falling in classes 4 and 5 depends on the reasonably quick market for the sale of space or of the property, with the equity sufficient to protect the security holder, based on market dom in considering classes 4 and 5 that interests junior to the first mortgage be in such form as not to endanger operations, and that the management of the properties is in responsible and capable hands. The real estate security falling in class 6 is dependent on the ressec-

ably quick marketability of space or of the property, with the equity sufficient to protect the security holder, based on market rather than conventional appraisal values, and should be coupled with an effective management, which in this type is of prime importawith an effective capital structure as to junior interests, so as not The real estate security falling in classes 7 and 8 forms the bulk of

the real estate securities offered to the investing public. While the principles pertaining to these classes are primarily applicable to that buildings, apartment houses and dwellings, they have a more or less direct application to all classes of real estate security.

The primary requirements of a sound and safe first m ment in classes 7 and 8 in our opinion ares

a. The present and future usefulness of the property with respect to community necessities and activities

b. The continued character of the surroundings within a rea radius with relation to zoning and building restrictions, to-wit, safeguarding against detrimental improvements and depreciation

c. A yield commensurate with the valuation of the property and the continuance of such meome or yield, and a fairly ready salability of the property in accordance with approved marketability values,

d. The established integrity, management, caretaking ability and financial responsibility of the mortgagor and no junior financial likely to endanger operations by an enforced change of ownership

The real estate security falling in class 9, such as clubs, etc., con sidered in the light of security value, is practically dependent on a fairly ready salability based on market value, and not on convertional appraisals or its adaptability for other purposes. Obviously the equity should be sufficient to provide the requisits margin of misty.

The occasion for this unexpected outburst was the opening of a residual hostel presented to Plymouth university by Viscount Astor, husband of Lady Astor, member of parable in the discovery and a shrewd application of the business of selling seats; through these qualities plus a sense of variety in scheduling its entertainment.

Mr. Shaw spoke at the opening ceremony.

"There is nothing whereof I am ask for something further from the length of the blennial contergence of the American Unitarian association. More than 300 have respected to put on "Wings Over Europe"; and the Guild can reasonably do an out-of-the-common play because of a special repute acquired in a full decade of activity. "The outcome is that he is almost incapable of original thought. I have had to work a good deal with university men. When everything appears like plain sailing, you get up against chunks of something very much worse than ignorance, in the university type of mind."

Mr. Shaw added to his idea of razing Oxford and Cambridge, saying: "There are several public schools generally regarded as nurseries for Oxford and Cambridge and they might share the same fate. If it is too much trouble to knock them down, use them as a saylums for the mentally defective."

Mr. Shaw was magnanimous regarding one side of university life.

He talks and talks; and he talks a tions of nature, hygiene and morality." deal as Woodrow Wilson talked before April of '17. He doesn't mention the self-determination of small peoples; but he has such things in mind.

His Majesty's ministers see in his thing that may secure and add to Brittain's glory and power; but Lightfoot Barnes of Smith college, whose tells them that, unless they join with book, "The Twilight of Christis tells them that, unless they join with him in making the world a better place, he will destroy that world. He is a bit mad, of course; and, when they realize that he is enough of a madman to make good his threat, they, in turn, go slightly mad. He tells them he will be back in Downing Street at noon for their decision; and Stapp, the War Minister, shoots tells them that, unless they join with ing Street at noon for their decision; and Stapp, the War Minister, shoots him to death. But even the death of Lightfoot and Britain's possession of his discovery serve not: word comes from Geneva that the League has the secret of controlling atomic energy, and is ready to employ it against any nation that does not plump for peace.

The dramatic essence of "Wings Over Europe" would compress neatly into a one-act play running well under an hour; but it is all right as it is if you care to hear the subject thrashed out in all conceivable details and from every credible angle. The authors are not detached writers: I should say that Lightfoot is the mouthpiece of their personal views on what should be done with the nations as nations. But they are not uninteresting in what they give to the opposition to may in reply to the lad, although they seem

they give to the opposition to say in reply to the lad, although they seem to be making weight when, in the interval of waiting for noon, the ministers turn each against all his fellows and tell nasty, unmanly secrets.

The piece is acted as well as it might be. Mr. Kirkland plays the dreamer with good effect until he turns to shouting in the belief that it is force. The others, thanks to good direction by Rouben Mamoulian (who staged "Porgy"), do their several and joint shares. It is not unbelievable that a British primate might lisp; nor yet that some American locutions should come forth in the language of British Cabinet-ministers: after all, Mr. Browne resided for years in this country, and the time for action is, the authors say, tomorrow morning.

EVANS & MAYER, MARINELLI GIRLS

To Hear Their Songs Is One Way to Boost American Composers BY EDWARD MOORE.

It was an interesting idea of Margaret Lester's to assemble the program that she calls "An Hour with Contemporary American Composers" and present it at Kimball hall last evening. Specifically it consisted of twenty-two songs from the pens of twenty-two different composers, plus

It was especially interesting because it confirmed a number of points re-sulting from previous observation. One was the remarkable restraint exhibited by those who wail the loudest over the lot of the American composer in staying away when an American program is presented. One fancies that there is a real call for a convention song here, something to the effect of "I Can't Give You Anything but Moral Support."

Another is that a good many Ameri deftness at writing songs. Of last night's twenty-two, some had excellent inventive powers and some had excel-lent, memories, but most of them knew how to construct an excellent song. Most of the texts were excellent, one a translation from the Sanscrit, three from Shakespeare, one by Rabindranath Tagore, one by Ed-mund Waller, a good many by moderns, and generally the texts were treated with complete respect but also with musical effectiveness.

Mrs. Lester has a voice of unusual ly agreeable quality, though with not quite the accurate dexterity in projecting words that one would expec in a program of this kind. Just the same, it was a program that in both arrangement and performance derves encouragement, not necessarily because it was American, but because it brought out some new and interest-ing items. Her husband, William Lester, was her accompanist. He, too, is a composer with many works to his credit, but like the other comp he was represented with one song. It was one of the good ones.

TALKIES, BAD MANNERS ARE KILLING THEATERS. JANE COWL DECLARES

with unprecedented success it actually is glowing with a fatal fever. In ten years nothing will remain of its present glory but two or three organizations like the Theater Guild That was the prediction of Jane Cowl today before the Women's Graduate club of Columbia university.

"I feel that the American theater is on its last legs," she declared. "We are being mechanized out of the theater by the talkies, the radio and the people who prefer convenience to beauty. There must be loveliness, glamour, the thrill before the curtain rises, but that is being lost.

"Christopher Morley's Hoboken of the bride-to-be, Mrs. Anna L. Smith, has been prominent in south side Democartic politics. At present she is head of the Chicago department of public welfare.

The engagement may be announced formally, it was stated, at a party at the bride's home on Saturday evening. The couple met five years ago. Mr. Wentworth is 34 years old and Miss Smith is 25.

Mr. Wentworth, who makes his home with his mother, Mrs. Moses J. Wentworth, at 1240 Lake Shore drive, is secretary of and assistant to the

christopher Moriey's Hoboken is secretary of and assistant to the project, started in fun, has become an incubator for bad manners in the theater. It is impossible to conceive how people can applaud such vulgarity and take part in it. How can actors give their best when the audience is putting on an artibition of its corrections. is putting on an exhibition of its own? Acting should be confined to the stage.

"Bad manners are not being featured in Hoboken alone. The talkies here are deing their share, with such vylgar scenes as that one in 'Broadway Melody' where Bessie Love is shown making up in her dressing room. Such scenes encourage the audience to unleash their bad manners, because people know the actors on the screen cannot hear them."

The Modes Demand **Foundation Garment** That Fits Figure

figure down to its m or not, the foundation garour figure just has to have it or oney is squandered. You must waistline and you must have olded hipline. The latter even nore than the former. Also you must ave a bust outline.

The good old days when you bought corset that did for your shopping vening dress are gone forever. Perfoundation carment, that provoked the change. Anyway, today try wearing your sports medel foundation gar-ment with your formal evening frock and you'll have to keep your opera-coat on all evening or the back view

their choosing. With the new style of dress they're going to prove pretty nearly as important as the frock. Certainly, a foundation garment should be tried out for the perfect one for your particular figure. In fact, women are ordering their foundation garments now and go for fittings as they do for their dresses. One establishdo for their dresses. One establishment in New York sells no garment for less than sixty dollars but we are assured that the figure is studied and the garment fashioned to meet every se may be, which study, indeed, ght reasonably be existed for the cost of the garment. But, of course one doesn't have to spend her annual allowance on foundation upkeep. For a reasonable sum one can be agree-ably molded. And a nice feature many of the new garments is that they have removable shoulde straps and hose supporters.

The silhouette under the current dress style will be improved additionally with care in selecting the other undergarments so that no fulling comes over the hips. That hipline is going to have to be trained down to perfection. It's just as well to give it some exercises while you're getting the underwardrobe attended for ne matter how well fitting the garments, if hips are bunchy they're going look that way regardless.

Modernists to Lead American Art Show, W. J. Sherwood Says

The task of sorting from a thousand entries, 300 paintings worthy of being hung in the galleries of the Chicago Art institute for the 42d annual exhibition of American paintings and sculpture, Oct. 24 to Dec. 8, was started yesterday by the jury. The work will continue today and the eligible

Members of the jury on paintings are Ernest L. Blumenschein, Taos, N. M.; Robert Brackman, Alexander Brook and Mahonri Young of New York; Claude Beck, Edmund Glesbert, and Alfred E. Hammill, Chicago.

The jury on sculpture is composed of Heinx Warneke, Mahonri Young, and John David Brein, and Olga Chemaing, Chicago.

WHAT LOVELY TEETH THAT CHILD HAS!

Many mothers say, "I'm all worn out trying to get Junior to use tooth paste." Here's an idea: Show him how helpful gleaming, white teeth will be when he grows up. Ask him if he prefers painful cavities. Show him how Pebeco, the scientific tooth paste, will keep his teeth sound and white, and help him avoid those painful trips to the dentist. Get him to try Pebeco a whole week—then it's a regular habit.—Adst.

KIND TO THE EYES

Come in at your very first opportunity for a free test of your hearing. Learn for sure whether or not your hearing is impaired -and if so, to what extent.

At our private testing room on the main floor of our downtown Electric Shop, 72 West Adams Street, our hearing specialist will assist you. You really make the test yourself, with the new Audiometer which scientifically measures your exact degree of hearing. It only takes ten minutes; you merely sit there and listen.

Western Electric Company (Graybar) in conjunction with the Bell Telephone System has spent half a million dollars perfecting this apparatus for the scientific testing of the human ear and for assistance to the partially deaf.

Take advantage of this scientific research. Find out for sure just how badly your hearing is impaired. Why not
